

G'day and welcome  
to this little study.

We are now at ***part 6***  
in a series of videos on  
***Daniel's Prophecy***  
***of the***  
***Seventy Weeks.***

The Holy Scriptures plainly show  
that it was Nehemiah, and  
Nehemiah alone who received the  
edict to restore and build  
Jerusalem?

Was it **444 B.C.**  
as some are saying?  
Or was it **445 B.C.?**

In this study we are going to bring out some solid historical evidence that the issuing of the *decree by Artaxerxes* in his *20<sup>th</sup> year* to *Nehemiah* in the *month of Nisan* occurred in the springtime of *445 B.C.*

***445 B.C.***

There are a number  
of articles related to this  
subject over at the website,  
***EndTimePilgrim . org.***

So in what year did  
Nehemiah receive  
that royal edict to  
***restore and build  
Jerusalem?***

Here is our scripture.  
And the narrator is  
Alexander Scourby

# Nehemiah 2

<sup>1</sup> And it came to pass  
*in the month of Nisan,*  
in the *twentieth year*  
*of King Artaxerxes,*  
*when wine was before him,* that I  
took the wine and  
gave it to the king.

So the edict came in the  
springtime Passover  
month of ***Nisan*** in the  
***20<sup>th</sup> year of Artaxerxes.***

**So we come to our next question. When was the first year of Artaxerxes? When did the Medo-Persian king Artaxerxes Longimanus ascend the throne?**

Some authorities assign the commencement of the reign of Artaxerxes to the ***death of Xerxes in July 465 B.C..*** These authors say the eldest son of Xerxes, (presumably the heir apparent), was then assassinated by Artaxerxes his younger brother who immediately took the throne in ***July 465 B.C..***

“Of the three sons of Xerxes the eldest was .... put to death by the youngest, Artaxerxes, ..... who at once, B.C. 465 , took the throne.”

- Page 365
- Ridpath's History of the World
- Jones Publishing Co. 1910

Sir Robert Anderson held  
to this *July 465 B.C.*  
commencement date as  
well.

“the death of Xerxes and  
the epoch (beginning) of  
the reign of Artaxerxes  
Longimanus should be assigned  
to the latter part  
of ***July, 465 B.C..***”

- Sir Robert Anderson  
“The Coming Prince” page 253

# By this reckoning

*The 1<sup>st</sup> Year  
of Artaxerxes  
Longimanus  
began in July of  
465 B.C. and  
ended in July  
464 B.C..*

**The 1<sup>st</sup> Year  
of Artaxerxes  
July 445 B.C,**

**His 20<sup>th</sup> year  
would have  
begun 19 years  
later in July of 446  
B.C.  
ending in July  
of 445 B.C.**

**The 1<sup>st</sup> Year  
of Artaxerxes**

**His 20<sup>th</sup> year**  
would have begun  
19 years later in  
July  
of **446 B.C.**  
and ended in  
July **445 B.C.**

***NISAN***

**The 1<sup>st</sup> Year  
of Artaxerxes**

**465 B.C.**

**464 B.C.**

**His 20<sup>th</sup> year**  
would have crossed  
the  
springtime  
**Nisan moon**  
in **445 B.C.**

**446 B.C.**

**445 B.C.**

***NISAN***

**NISAN**

By this reckoning the  
*20<sup>th</sup> year of Artaxerxes*  
tags the springtime  
*Nisan moon* in *445 B.C.*

Others present evidence that  
*Artabanus* reigned  
for *seven months*  
*from July 465 B.C.*  
only to be assassinated  
by Artaxerxes in  
*February of 464 B.C.*

“Xerxes was assassinated  
by *Artabanus* .....

Consequently the accession  
of Artabanus can be fixed as  
*July or August B.C. 465.*”

Ref. SAO/NASA Astrophysics Dating System

Title: Aramaic Papyri from Assuan, note on  
regnal years by E.B. Nobels, 1908

Monthly notices –

Royal Astronomical Society, vol. 69, page 8

***“Artabanus reigned for seven months, all authorities agree, which brings us to February B.C. 464 when he was killed by Artaxerxes, whose accession can be thus fixed with considerable accuracy”***

Ref. SAO/NASA Astrophysics Dating System

Title: Aramaic Papyri from Assuan, note on regnal years  
by E.B. Nobels, 1908

Monthly notices –

Royal Astronomical Society, vol. 69, page 8

By this reckoning

*The 1<sup>st</sup> Year  
of Artaxerxes  
Longimanus  
began in  
February of 464  
B.C.*

# The Ascession of Artaxerxes

The 1<sup>st</sup> Year  
of Artaxerxes

464 B.C.

463 B.C.

His 20<sup>th</sup> year  
would have begun  
19 years later in  
Feb.

of 445 B.C.

445 B.C.

444 B.C.

***NISAN*** (March-April)

# The Ascession of Artaxerxes

The 1<sup>st</sup> Year  
of Artaxerxes

464 B.C.

463 B.C.

His 20<sup>th</sup> year  
would have still  
included the  
springtime  
**Nisan moon**  
of 445 B.C.

445 B.C.

444 B.C.

**NISAN** (March-April)

According to this reckoning  
the **20<sup>th</sup> year of Artaxerxes**  
**STILL** tags the springtime  
**Nisan moon** in **445 B.C.**

*July*  
*446 B.C.*

**NISAN**

*February*  
*445 B.C.*

**NISAN**

**NISAN**

By this reckoning the  
*20<sup>th</sup> year of Artaxerxes*  
tags the springtime  
*Nisan moon* in *445 B.C.*

So in which year did  
the command come to  
***restore and rebuild*** the city  
of ***Jerusalem***?

Using ***BOTH*** reckonings  
of the commencement  
of his reign, the  
***20<sup>th</sup> Year of Artaxerxes***  
still encompasses the  
***Nisan moon of***  
***445 B.C.***

***The Edict  
came in  
445 B.C.***

So the Edict of Artaxerxes  
Longimanus in his 20<sup>th</sup> year  
as given to Nehemiah came  
under the springtime  
***Nisan moon of 445 B.C.***

***Nisan 445 B.C.***

This was the event that  
initiated the ***Seventy  
Weeks Prophecy.***

I hope you are finding these studies helpful. They are being provided freely to all who love the God of Israel. Other videos are at the YouTube channel.
